Zephyr Cloud Virtual Desktops are a true, persistent Windows 10 virtual desktop experience.

Built for performance, usability, and reachability.

Your Widows Desktop. . .
On any device, at any time, anywhere.

All of our virtual desktops include:

- Microsoft Office Professional

- Enterprise class Email with MS Outlook; MS Teams; SharePoint; and OneDrive for Business integration with 1TB of user storage.

- Additional applications such as Visio and Project available.

Also available with Virtual Desktop Packages:

Window File Share. High-speed Network File Share, with user authorized access, security, and control. File Share includes shadow copies of all files, twice per day with historic file versioning available.

Available in shared or dedicated deployments, on premise to Zephyr Cloud Datacenters or in Azure Cloud.

Zephyr Cloud Remote App:

Zephyr Cloud offers customers a way to remotely and securely access any support-ed application directly from our datacenter (i.e. QuickBooks). Applications that are launched from our portal, using any HTML 5 compatible browser, look and feel exactly like the normal application launching from a user's local machine.

Zephyr Cloud Remote App is available as a standalone product, or part of a user's Virtual Desktop. Application license and management is user's responsibility.
